THE WEATHER FORECASTS BY FLAG SIGNALS.

No. 1. WHITE Local rain weather. signal.

Explanation of the Flags.

The flags are hoisted each day upon the issue of the morning weather map and float until dark. They indicate the weather that may be expected during the following thirty-six hours, but more particularly the last twenty-four hours of that period. They are to be read from the top of the staff downward. If more than one kind of weather is predicted for the period from 8 p.m. to 8 p.m. the conditions first samed in the forecast will be represented by the uppermost flag. When a warning of a "cold wave" is included in the forecast message, the cold-wave flag will be displayed below the proper weather flag.

The temperature flag, when placed above numbers 1, 2 or 3, indicates warmer weather; when placed below numbers 1, 2 or 3, indicates colder weather; when not displayed, the indications are that the temperature will remain stationary.

The court sent the case to the grand jury and fixed the bond at \$500, in default of which she was committed.
